Skylar:

The Malibu Unites Team and our thousands of supporters, Thanks You, Skylar for supporting us!

On Monday night, your community: parents, students, and concerned citizens stood before you and the Malibu City Council demanding that you all stand up and be leaders in this toxic crisis our schools are facing. You heard mothers tell you stories about their sick children, you heard that forty- four 7th grade students who have been removed from MHS and are sad they could not go to school with their friends, an endocrinologist stating that they are concerned for all of their patients who are being exposed to PCBs at Malibu High, and you heard a child say that they thought the adults elected by their parents were supposed to protect them but were failing to do so.

Thank you for hearing them and standing up to SMMUSD and demanding proper testing and removal of toxic PCB's. Together and united we will ensure the caulking is tested in all pre-1979 classrooms at Malibu High and Juan Cabrillo and immediately removed according to federal law for the safety and health of our children and teachers.

There is nothing more important than protecting the future of America, our children.

With gratitude,

Jennifer deNicola &
Hope Edelman
And the entire Malibu Unites Leadership Team
